A FULLY, IMMERSIVE, LARGE SCREEN 3D EXPERIENCE

With picture performance that outpaces today's smaller flat panels, Mitsubishi 3D DLP Home Cinema TVs offer a larger than life, intensely vivid 2D, and fully immersive 3D viewing experience. In huge screen sizes ranging from 65" to 82", Mitsubishi Diamond 838 TVs deliver incredible picture performance at an exceptional value, and completely define the large screen 3D entertainment category.

3D is an immersive large screen experience. All 2010 Mitsubishi 3D DLP Home Cinema TVs utilize the same core DLP technology that power the vast majority of 3D Cinemas - DLP! DLP technology is up to 1,000 times faster than LCD, providing a sharper and more realistic 3D TV experience in the home.

*TV and some PC displays have standard overscan. Features, specifications and dimensions are subject to change without notice. Physical appearance of television and matching base may vary slightly from images shown on this document. Mitsubishi 3D TVs (738 and 838 series) currently support the side-by-side 3D signal format. For support of other 3D formats, such as top-bottom and frame packing (3D Blu Ray standard), Mitsubishi 3D TVs will require the use of a 3D source device that outputs the 3D checkerboard format or a 3D source device coupled with the Mitsubishi 3D adapter. In all cases an emitter and matching 3D active shutter glasses or DLP Link active shutter glasses are required in order to view 3D content. Please refer to our web site www.mitsubishi-tv.com for the most current information. *If you are having trouble connecting your TV or accessing StreamTV internet media services contact Mitsubishi Customer Relations at 1-800-332-2119.
