

# SNP-2

## STREAMING NETWORK PLAYER

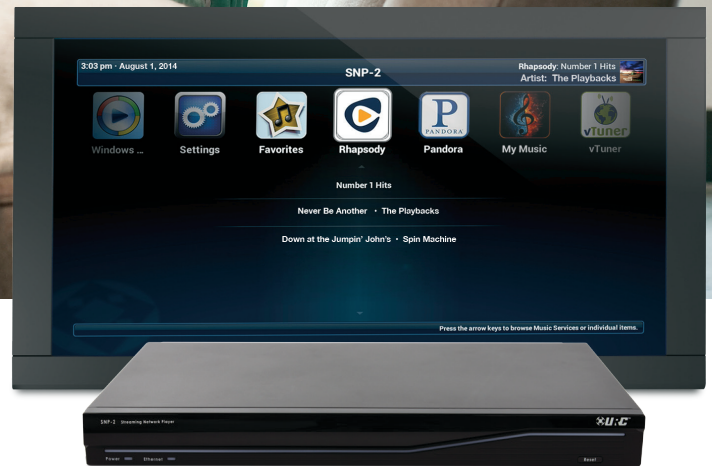

### A personal gateway to all your music

The SNP-2 Streaming Network Player merges all music sources into one simple solution and graphical menu, providing access to streaming music services such as SiriusXM® and Pandora®, Rhapsody®, vTuner and thousands of other internet radio stations — plus your own music collection that's stored on an attached NAS drive, PC, and/or Apple® computer. Windows Media, iTunes® files and Playlists are supported.

### Enjoy your favorites – your way!

With just one button press on a URC remote, keypad, touch screen or your own handy smartphone or tablet you gain immediate control of your tunes from anywhere. Multiple units may be connected so Mom can listen to her favorite Pandora station in the living room while Dad's listening to Internet Radio in the den – at the same time. And,

with its HDMI output, anyone in the family can view and control the SNP-2 with an interactive, engaging on-screen TV interface.

### Deliver music in one room or many

The SNP-2 can be used as a standalone music component with URC's Complete Control™ system or may be connected to our Total Control® whole-house automation system for selection throughout the home and outdoors by the pool or patio. With Total Control Amplifiers, you can stream audio to up to 32 different areas, and control the music effortlessly from one of many devices such as our TRC-1280 Remote. Choose songs, view artist and album information, and set up a party playlist for entertaining in minutes. Your music is made magic with the SNP-2.

# Tech Talk

## FEATURES

- SiriusXM® and Pandora® Internet Radio, Rhapsody®, vTuner® Internet Radio, and other services onboard (enrollment and/or subscriptions may be required)
- Access your own music collection that's stored on an attached NAS drive, PC, and/or Apple computer. Windows Media, iTunes® files and Playlists are supported.
- Streaming output via 44kHz streams music to Total Control DMS-Series Amplifiers
- Analog outputs for compatibility with other brand systems
- Two-way communication and status feedback provided with Total Control remotes, keypads, touchscreens and with smartphones and tablets via URC MRX Advanced Network System Controller
- For an optimal installer setup and user experience, the following interface products are recommended with the SNP-2: TRC-1080, TRC-1280, TKP-2000, TKP-7000, and URC's mobile apps for smartphones and tablets
- On-screen Graphical User Interface (GUI) provides music metadata and control menus
- Outputs 24-bit 192 KHz FLAC files natively from the Analog and Digital outputs. Automatic down-conversion for DMS streaming
- Easy rack-mounting
