

Use this order form to specify the matrix model and individual transmission cards for your custom modular matrix. Read the steps below and fill in the chart on the back of this form with the matrix model and transmission card numbers.

If you would like to configure the matrix and submit online, please visit the MX-0808-PP-POH-CUSTOM and MX-1616-PP-POH-CUSTOM product page at [www.wyrestorm.com](http://www.wyrestorm.com).

- 1.) Select an 8x8 (MX-0808-PP-POH-CUSTOM) or 16x16 (MX-1616-PP-POH-CUSTOM) matrix chassis – beginning with the Matrix 1 column. Write in the model number. You can order up to 8 matrices using this form.
- 2.) Up to 8 matrices can be cascaded in any combination of 8x8 and 16x16 models.
- 3.) Add Transmission Cards: Select from the list of digital and analogue cards and populate your matrix (cards can be positioned in any order).

- 4.) Cascade Multiple Matrices: The TX-POH-020 card is an HDMI pass-thru card and enables the source device to be cascaded.

When the TX-POH-020 card is added, additional matrices can be added to create larger distribution systems. Add one TX-POH-020 card to add one additional matrix.

- 5.) Write your matrix and card selections clearly into the table overleaf and complete the additional details below.
